(Manuscript received 12 February 2015)

Abstract

This is the second paper of the systematic checklist of the Egyptian species of family Halictidae (Order: Hymenoptera), includes subfamilies Nomioidinae, Nomiinae and Rophitinae is presented. The subfamily Nomioidinae consisting of 11 species belonging to 2 genera and 2 subgenera. Three species of this subfamily were added to the Egyptian fauna. The subfamily Nomiinae includes 8 species belonging to 3 genera and 2 subgenera. Two species of this subfamily were added to Egyptian fauna. The third subfamily includes 6 species belonging to 3 genera. In addition to three species were recorded from neighboring countries and probably will be recorded later from Egypt. The checklist is arranged according to species membership in higher – level taxa, based on the most recent literature of family Halictidae.

INTRODUCTION

Family Halictidae includes four subfamilies namely: Halictinae, Nomioidinae, Nomiinae and Rophitinae (Michener, 2007), it contains about 72 genera and nearly 3500 currently recognized species worldwide (Pesenko, 2007). The Egyptian fauna and also Palearctic fauna of subfamilies Nomioidinae, Nomiinae and Rophitinae were studied by several scholars such as: Handlirsch (1888); Friese (1898); Debski (1917); Alfken (1927); Blüthgen (1925, 1933 & 1934); Warncke (1976, 1979 & 1980); Pesenko (1983, 2000 & 2007); Ebmer (1984, 1993 & 1999); Pauly (1990 & 2012); El-Akkad (1993); Baker (1996 & 2002); Shoukry, *et al.* (2004); Pesenko & Pauly (2005 & 2009); Michener (2007).

The present study is carried out to clarify the recent taxonomic status of three subfamilies of family Halictidae and their members in Egypt.

MATERIALS AND METHODS

The checklist of family Halictidae of Egypt is based on all records found in the available entomological literature and those reviewed from the preserved specimens in the main Egyptian insect collections. These collections are: the Egyptian Entomological Society collection, Ain Shams University collection and collection of the Plant Protection Research Institute, Ministry of Agriculture. Identification of the specimens had been confirmed early by A. W. Ebmer (Austria) and the late Prof. Dr. K. Warncke (Germany), the specialists of Halictidae of Palearctic region. These specimens preserved in the collection of Plant Protection Research Institute, Ministry of Agriculture. The nomenclature and taxonomic status are adopted from the following sources: Pesenko (1984); Warncke (1992); Ebmer (1976 & 1995); Michener (2007), Bogusch & Straka (2012), Pauly's Atlas Hymenoptera online (2012) and Ascher & Pickering (2014). The checklist is arranged according to species membership in higher – level taxa, based on the most recent literature. Synonyms, taxonomic notes and published records from Egypt are included.

Family: Halictidae

Subfamily: Nomiodinae Börner, 1919

Nomiodinae Börner, 1919, Biologisches Zentralblatt, 39: 145-185.

The subfamily Nomiodinae consists of minute species (2.5 – 6.5 mm.) often with yellow or cream markings on head, mesosoma and metasoma. It includes three genera all over the world; two of them are represented in Egypt.

Genus: *Ceylalictus* Strand, 1913

This genus is represented by a single subgenus covering only two species in Egypt as follows:

Subgenus: *Ceylalictus* Strand, 1913, Arch. Naturg., 79 (12): 127 – 171.

39: *Ceylalictus (Ceylalictus) punjabensis* (Cameron, 1907)

= *Ceratina punjabensis* Cameron, 1907, Journal of the Bombay Natural History Society, 17 (4): 1003.

Published records from Egypt:

Debski (1917): 31 – 32 (key to males and females); 46 – 50 (Re- description); *Nomioides fasciatus* Friese. Blüthgen (1925): 61: *Nomioides fasciata* var. *punjabensis* Blüthgen. Alfken (1927): 105: *Nomioides fasciata* Friese. Blüthgen (1933): 24: *Nomioides fasciata* Friese. El-zoheiry & Mohamed (1949): 75: *Nomioides fasciata* Friese. Shalaby (1958): 80: *Nomioides fasciata* Friese. Pesenko (1983): 178: (key to females); 179 (key to males): *Ceylalictus (Ceylalictus) punjabensis* (Cameron). El-Akkad (1993): 174 - 175 (key to females); 175 - 176 (key to males); 185– 188

(Synonym, re – description; 54 specimens examined (24♀ + 30♂)): *Nomiooides fasciata* Friese. Pauly *et al.* (2002), Bulletin de l'Institut Royal des Sciences Naturelles de Belgique, Entomologie, 72: 206: (Synonymy & distribution): *Ceylalictus (Ceylalictus) punjabensis* (Cameron). Pesenko & Pauly (2005): 143 – 144 (key); 157 – 160 (Re- description): *Ceylalictus (Ceylalictus) punjabensis* (Cameron). Pesenko & Pauly (2009): 219: *Ceylalictus (Ceylalictus) punjabensis* (Cameron). Saini & Vikram (2012): 137 (Distribution): *Ceylalictus (Ceylalictus) punjabensis* (Cameron).

40: *Ceylalictus (Ceylalictus) variegatus* (Olivier, 1789)

= *Apis variegata* Olivier, 1789: Encyclopedia méthodique Paris: 139.

Published records from Egypt:

Handlirsch (1888): 402 – 404: *Nomiooides variegate* (Olivier). Friese (1898): 307: Original description of *Nomiooides fasciatus* sp. n. ♀, ♂, [Lectotype: Heluan, Egypt]. Debski (1917): 31 & 33 (key to males and females); 46 – 50 (Re- description): *Nomiooides variegates* (Olivier). Sowerby (1917), Entomologist, 50 (2): 31: *Nomiooides variegate* (Olivier). Alfken (1927): 105: *Nomiooides variegate* (Olivier). Blüthgen (1933): 24: *Nomiooides variegate* (Olivier). El-zoheiry & Mohamed (1949): 75: *Nomiooides variegate* (Olivier). Shalaby (1958): 81: *Nomiooides variegate* Olivier. Pesenko (1983): 178 (key to females); 179 (key to males): *Ceylalictus (Ceylalictus) variegatus* (Olivier). El-Akkad (1993): 174 - 175 (key to females); 175 - 176 (key to males); 198–202 (Synonymy, re – description; 375 specimens examined (145♀ + 230♂)): *Nomiooides fasciata* Friese. Pesenko & Pauly (2005): 144 (key to males and females); 160 – 164 (Re- description): *Ceylalictus (Ceylalictus) variegatus* (Olivier). Pesenko & Pauly (2009): 219 – 221: *Ceylalictus (Ceylalictus) variegatus* (Olivier). Saini & Vikram (2012): 137 (Distribution): *Ceylalictus (Ceylalictus) variegatus* (Olivier).

Genus *Nomiooides* Schenck 1867

Nomiooides Schenck, 1867, Berliner Entomologische Zeitschrift 10: 333.

This genus is widespread in the Palaearctic region. It is represented by a single subgenus covering nine species from Egypt; three of them newly added to the Egyptian fauna namely: *N. (Nomiooides) bluethgeni* Pesenko, *N. (Nomiooides) micheneri* Pesenko & Pauly and *N. (Nomiooides) ornatus* Pesenko.

Subgenus *Nomiooides* Schenck, 1867, Berliner Entomologische Zeitschrift 10: 333

41- *Nomiooides (Nomiooides) aegyptiaca* Blüthgen, 1933

Published records from Egypt:

Blüthgen, (1933): 25 – 27: Original Description of *Nomiooides aegyptiaca* sp. n. (Type: 1♀ from Gabal el Asfer 27/10/1925 & 1 ♂ from Wadi Nesour (Heluan), 23/10/1925). El-zoheiry & Mohamed (1949): 75: *Nomiooides aegyptiaca* Blüthgen. Shalaby (1958):

80: *Nomioides aegyptiaca* Blüthgen. El-Akkad (1993): 174 - 175 (key to females); 175 - 176 (key to males); 177-179 (Synonymy, re - description; Holotype examined (♀ + ♂)): *Nomioides aegyptiaca* Blüthgen. Pesenko & Pauly (2005): 133 & 215: They could not examined the type of this species, for this reason, they considered *Nomioides aegyptiaca* as a dubious name belong to genus *Nomioides* subgenus *Nomioides* until examination of the type.

42- *Nomioides (Nomioides) bluethgeni* Pesenko, 1979

- = *Nomioides (Nomioides) bluethgeni* Pesenko 1979, Trudy Vsesoyuznogo Entomologicheskogo Obshchestva, 61:176 ♂.
- = *Nomioides (Nomioides) bluethgeni* Pesenko, 1983: 125♀.

Published records from Egypt:

Pesenko (1979): 176: Original description of *Nomioides (Nomioides) bluethgeni* sp. n. Pesenko (1983): 125 (key to females); 128 (key to males): *Nomioides (Nomioides) bluethgeni* Pesenko. Pesenko & Pauly (2005): 168 - 172 (key to males and females); 174 (Synonymy & re- description): *Nomioides (Nomioides) bluethgeni* Pesenko. Pauly (2012): (Distribution: Morocco, Egypt, Kenya, Jordon, Syria and Armenia): *Nomioides (Nomioides) bluethgeni* Pesenko.

43- *Nomioides (Nomioides) deceptor deceptor* Saunders, 1908

- = *Nomioides deceptor* Saunders 1908, Trans. Royal Entom. Soc. London, (2): 223, ♀, ♂.

Published records from Egypt:

Warncke (1980): 363, 365: *Nomia (Lobonomia) armata* ssp. *latipes* Morawitz. Pauly (1990): 68 (key to males and females); 70 (Synonymy & Distribution): *Pseudapis armata* (Olivier). Baker (2002): 22 – 24 (Synonymy); 50 - 58 (key to males): *Pseudapis (Pseudapis) nilotica* (Smith). Shoukry *et al.* (2004): 149 (key to males and females); 149 – 150 (Re- description): *Pseudapis (Pseudapis) armata* (Olivier).

57- *Pseudapis (Pseudapis) nubica* (Warncke, 1976)

Nomia (Lobonomia) nubica Warncke, 1976: 117.

Published Records from Egypt:

Warncke (1976): 94 – 96 (key to females); 117 (Original description of female: Holotype: ♀ Helioplis, IX. 1913; Egypt): *Nomia (Lobonomia) nubica* sp. n. Pauly (1990): 67 - 68 (key to males and females); 76 (Diagnosis of male and female & Distribution: Egypt and Somale): *Pseudapis nubica* (Warncke). Baker (2002): 33: (Synonymy); 50 – 58 (key to males): *Pseudapis (Pseudapis) nubica* (Warncke). Shoukry *et al.* (2004): 149 (key to females); 153 (Re- description): *Pseudapis (Pseudapis) nubica* (Warncke).

Subfamily: Rophitinae (= Dufoureinae)

The subfamily Rophitinae needs further taxonomic studies; where the number of recorded species from Egypt very few compared to the number of recorded species from Palaearctic Region. It is recognized by the following characters: antennal sockets are below the mid-length of eyes and somewhat closer to the upper clypeal margin. Anterior margin of labrum is rounded or sometimes truncate and the hind basitarsus without penicillus. Only three genera and 6 species are recorded from Egypt.

Genus: *Dufourea* Lepeletier, 1841

Subgenus *Dufourea* Lepeletier, 1841, Hist. Nat. Insects Hymen. Vol. 2: 227

58- *Dufourea (Dufourea) ciliata* Ebmer, 1993

Published records from Egypt:

Female unknown

Ebmer (1993): 24 – 25 (Original description: Holotype: Egypt, Kom Ombo, 16 – 18/2/1958 and Paratype: Egypt, Wadi Katara, 3. 1988): *Dufourea (Dufourea) ciliata* sp. n.; ♂. Pauly (2012): (Distribution: Egpt): *Dufourea (Dufourea) ciliata* Ebmer

59- *Dufourea (Dufourea) rufiventris* Friese, 1898

Published Records from Egypt:

Friese (1898): 303-313 (Original description: Egypt): *Dufourea rufiventris* sp. n. El- zoheiry & Mohamed (1949): 76: *Dufourea rufiventris* Friese Shalaby (1958): 39: *Dufourea rufiventris* Friese. Ebmer (1984), Sencken bergiana biol., 64: 356: *Dufourea (Dufourea) rufiventris* Friese. Ebmer (1999): 198 (Distribution: Egypt and Israel): *Dufourea (Dufourea) rufiventris* Friese. Pauly (2012): (Distribution: Egypt and Israel): *Dufourea (Dufourea) rufiventris* Friese.

60- *Dufourea (Dufourea) similis* Friese, 1898

Published records from Egypt:

Friese (1898): 303 – 313: Original description of *Dufourea similis* sp. n. (Egypt). El- zoheiry & Mohamed (1949): 76: *Dufourea similis* Friese. Shalaby (1958): 39: *Dufourea similis* Friese. Ebmer (1999): 186 (Distribution: Tunisia, Morocco, Libya, Egypt, Israel and Syria): *Dufourea (Dufourea) similis* Friese. Pauly (2012): *Dufourea (Dufourea) similes* Friese.

Subgenus: *Rophites* Spinola, 1808, Insectorum Liguriae species Novae aut Rariors: 2 & 72.

61- *Rophites quadratus* Friese, 1898

Published records from Egypt:

Friese (1898): 305 (Original description: Egypt): *Rophites quadratus* sp. n. El- zoheiry & Mohamed (1949): 76: *Rophites quadratus* Friese. Shalaby (1958): 39: *Rophites quadratus* Friese.

Michener (2007): 437: *Pararhophites quadratus* Friese.

The systematic postion of this species as follows:

Family Megachilidae: Subfamily Pararhophitinae: tribe Pararhophitini.

Genus: *Systropha* Illiger, 1806

Subgenus: *Systropha* Illiger, 1806, Magazin für Insektenkunde, 5: 145

62- *Systropha (Systropha) hirsute* Spinola, 1839

= *Systropha hirsuta* Spinola, 1839, Annales de la Société Entom. France, 7: 516, Egypt, Nobia or Arabia. Lectotype ♂ from Egypt preserved in Museo Regionale di Storia Naturale, Torino, Italy.

Published records from Egypt:

Casolari & Casolari Moreno (1980), Museo Regionale di Scienze Naturali: 159 (Distribution: Egypt): *Systropha pilosa* Spinola. Warncke (1992), Linzer biologische Beiträge, 24: 742: Original description of *Systropha christae* sp.n. from Israel. Baker (1996): 1530 & 1543 (key to males); ♂, Wadi El Natrun, 17/4/1992, Egypt: *Systropha hirsuta* Spinola. (= *Systropha christae* Warncke, 1992) Patiny & Michez(2006), Annales de la Société entomologique de France, 42 (1):30 & 31 (key to males); 33 (key to females): *Systropha* (*Systropha*) *hirsuta* Spinola.

Genus: Trilia Vachal**63- *TRILIA MUOTI VACHAL*, 1900**

=*Dufourea* (*Trilia*) *muoti* Vachal, 1900, Ann. Soc. Entom. France, 68: 534. ♂,

Published Records from Egypt:

Warncke (1979): 118: *Rophites muoti* Vachal. Ebmer (2008), Linzer Biologische Beiträge, 40 (1): 605: *Trilia muoti* Vachal; (♀, Lectotype from Algeria: Ghardaia). Astafurova (2010), Entomological Review, 90 (6): 760 – 763: (key to species and distribution: Algeria, Tunisia and Egypt)

Additional species can be expected later in Egypt

The following species recorded from neighboring countries and probably will be recorded later from Egypt:

1- *Dufourea* (*Dufourea*) *chagrina* (Warncke, 1979)**Published records from neighboring countries:**

Warncke (1979): 111- 155: Original description and distribution (Morocco, Tunisia and Israel): *Dufoura chagrinachagrina* sp. n. Ebmer (1993): 20: (Distribution: Tunisia and Israel): *Dufourea* (*Dufourea*) *chagrina* (Warncke). Ebmer (1999): 187: (Diagnosis and Distribution: Israel, Tunisia and Morocco): *Dufourea* (*Dufourea*) *chagrina* (Warncke).

2- *Dufourea* (*Dufourea*) *nodicornis* (Warncke 1979)**Published records from neighboring countries:**

Warncke (1979): 111- 155: Original description and distribution (Morocco, Tunisia, Libya, Israel, Jordon and Syria): *Dufoura nodicornis* sp. n. Ebmer (1993): Distribution (Tunisia, Jordon and Syria): *Dufourea* (*Dufourea*) *nodicornis* (Warncke). Ebmer (1999): 188: Distribution (Libya, Tunisia, Algeria and Israel): *Dufourea* (*Dufourea*) *nodicornis* (Warncke).

3- *Rophites algirus algirus* Pérez, 1895: 51-56**Published records from neighboring countries:**

Ebmer & Schwammerger (1986), Senckenbergiana Biologica, 66: 277 - 278 (key to females); 278 – 280 (key to males); Distribution (North Africa: Algeria). Type locality: Morocco, Tunisia (new record), Israel and Libanon; *Rophites algirus algirus* Pérez.

قائمة تصنيفية لفصيلة هاليكتيدي في مصر (رتبة غشائية الأجنحة)

مع عرض للأبحاث المنشورة لها

٢ - تحت فصيلات نوميويدينى ، نوميينى وروفيتىنى

محمد كمال العقاد وعماد الدين عبد الفتاح معرض ببىرس

معهد بحوث وقاية النباتات ، مركز البحوث الزراعية ، الدقى ، الجيزة ، مصر

إشتملت الورقة الثانية من القائمة التصنيفية على الأنواع المصرية من فصيلة هاليكتيدي (رتبة غشائية الأجنحة) تحت فصيلات نوميويدينى ، نوميينى وروفيتىنى مع عرض لجميع الأبحاث المنشورة لهذه المجموعة من الفصيلات. تتكون تحت فصيلة نوميويدينى في مصر من ١١ نوع تنتهي إلى جنسان و ٢ تحت جنس وتم إضافة ثلاثة أنواع منها إلى البيئة المصرية . وإشتملت تحت فصيلة نوميينى على ثمانية أنواع تنتهي لثلاثة أنجاس وتم إضافة نوعان منها إلى البيئة المصرية. وإشتملت تحت فصيلة روفيتىنى على ستة أنواع تنتهي إلى ثلاثة أنجاس بالإضافة إلى ثلاثة أنواع تم تسجيلها في البلاد المجاورة لمصر ويحتمل تسجيلها في مصر. تم ترتيب القائمة طبقاً لعضوية الأنواع في المراتب التصنيفية العليا وطبقاً لمعظم المراجع التصنيفية الحديثة لفصيلة هاليكتيدي.
